## Clean Energy Development Fund CEDF

### Why wood heat?

The CEDF has made a strategic decision to build the Vermont advanced wood heating market. Increasing the amount of advanced wood heating in Vermont will support a vibrant economy, healthy forests, a cooler climate, and energy resiliency across the State.

## Pellet or Chip Boiler/Furnaces Incentives

The Vermont Small-Scale Renewable Energy Incentive Program provides incentives for qualifying advanced wood pellet (and chip) boilers and solar hot water systems. The program is administered by the [Renewable Energy Resource Center \(RERC\)](http://www.nerc-vt.org) (under contract with the CEDF), incentive applications and complete program information can also be obtained at their web site: [www.nerc-vt.org](http://www.nerc-vt.org). The RERC can also be reached at 1-877-888-7372.

## Bulk Central Heating Pellet System Incentives:

**Residential systems** = \$3,000.

**Commercial Customers:** \$1.25/sq ft of heated space up to \$60,000 and an additional incentive of up to \$10,000 for including thermal storage tanks.

### Non-Profit Public Serving Institutions/towns:

\$1.25/sq. ft. of heated space up to \$80,000 and an additional incentive of up to \$15,000 for thermal storage tanks.

## Wood Stove Change-out

Together with the Agency of Natural Resources' Division of Air Quality and Climate the CEDF is offering an incentive for Vermonters to replace their old wood stoves with a new, clean burning wood or wood pellet stove. The Change-out Program Goals are:

- Reduce emissions of wood smoke in Vermont
- Increase the use of cleaner wood and wood pellet burning stoves in Vermont
- Promote sustainable and healthy VT forest economy
- Support VT wood and pellet stove manufacturers and dealers

**The incentive is \$500 to \$1,500** towards the price of a professionally installed new wood or pellet stove when an old non EPA-certified stove is taken out of service. Incentive level (\$500 to \$1,500) is dependent on the emission rate of the new stove.
