

Job Description – Commercial Solar Project Manager

Come join New England's largest PV Installer as we expand our commercial solar business into multiple states. The Peck Company is a 48 year old electrical contractor that has spent the past decade focusing on the renewable energy industry. We are looking for an experienced project manager to oversee PV and commercial battery storage installations throughout Vermont.

Responsibilities

- Coordinate and oversee the installation of multiple commercial projects.
- Candidates will be responsible for oversight of all activities related to engineering, permitting and construction to set each project up for a successful completion
- Adherence to plan set and engineering via coordination with in house and client designers
- Material Coordination and ordering
- Coordination and performance of all inspections with local jurisdictions.
- Coordination and performance of all inspections with clients
- Foster effective relationships with employees, subcontractors, and customers
- Monitor and document on site progress reports to client and management via online software
- Produce and revise master schedules including constructions and key deliverables using company tools
- Review and oversight of drawings to ensure completeness and constructability
- Safeguard client satisfaction, quality control, profitability, and problem resolution

Requirements

- 3+ years of experience managing commercial solar PV projects
- Experience with analyzing site specific project strategy & development
- Effective ability to manage multiple General Foremen
- Strong ability to prioritize and manage multiple projects in a fast paced work environment
- Auto Cad or other solar specific software a plus
- Vermont Journeyman's license or the ability to quickly achieve this license
- NABCEP certification is a plus
